DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by KR 10-2001-0037081.

KR 10-2001-0037081 teaches a method for stopping a drum type washing machine after dewatering by braking the machine intermittently if unbalanced conditions are sensed. Since the sudden braking is applied the laundry is separated from the drum at least to the some extent by the applied braking force. See Abstract.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 1746

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

- 6. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - 1. Determining the scope and contents of the prior art.
 - 2. Ascertaining the differences between the prior art and the claims at issue.
 - 3. Resolving the level of ordinary skill in the pertinent art.
 - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 7. Claims 2-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over KR 10-2001-0037081 in view of Sonoda et al (US 2003/0046962) and JP 05-269292.

For claim 2 this is an alternative rejection.

KR 10-2001-0037081 teaches a method for stopping a drum type washing machine after dewatering by braking the machine intermittently if unbalanced conditions are sensed.

KR 10-2001-0037081 does not teach the use of speed control to determine and prevent unbalanced rotation.

Art Unit: 1746

However, Sonoda et al and JP 05-269292 teach that it was known to control the rotational speed of the motor to determine and prevent unbalanced conditions. Sonoda et al teach such for a drum type machine. JP 05-269292 teaches such after dewatering process. Both documents further teach application of force to the motor by braking intermittently (JP document) and/or by reverse rotation braking (Sonoda et al). Sonoda et al teach that reverse rotation braking separates laundry from the drum. See entire JP document (translation is provided), especially Figs. 1 and 4 and the related description and entire document of Sonoda et al, especially parts [0063] – [0099].

It would have been obvious to an ordinary artisan at the time the invention was made to use control and braking disclosed by JP 05-269292 and Sonoda et al in operation of a drum-type machine after dewatering process disclosed by KR 10-2001-0037081 in order to prevent unbalanced operation and safely and noise free stop the machine because KR 10-2001-0037081 teaches that unbalanced conditions could be presented in the stopping the drum type machine after dewatering and because Sonoda et al and JP 05-269292 teach that such conditions can be prevented by controlling the speed of the motor and applications of braking based on such control; and because Sonoda et al and JP 05-269292 teach such braking was conventional and recommended by the prior art to prevent unbalanced operation.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patents 5,913,952 and 5,937,467 and JP 02-071797 and 04-

Art Unit: 1746

038994 are cited to show the state of the prior art with respect to operation of washing machines.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander Markoff whose telephone number is 571-272-1304. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Barr can be reached on 571-272-1414. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
